

## **ATTENTION**

Please be aware that a **nationwide test of the UK Emergency Alert system** is scheduled for **3:00 PM BST on Sunday 7 September**.

During this time, compatible mobile phones may emit a loud siren sound and display a message, even if set to silent. This is part of a government test and no action is required.

We're aware this coincides with the Event, so please don't be concerned when the alert is triggered.

Thanks for your understanding.
